

Empathy Map

Date	18 July 2026
Team ID	TBD
Project Name	Voice Based Concept Understanding Analyser
Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS	THINKS
• I want to know whether I understood the concept correctly. • I need instant feedback after explaining my answer. • Manual evaluation takes too much time. • I want to improve my communication skills.	• Did I explain the concept correctly? • Will my explanation match the expected answer? • How can I improve my conceptual understanding? • I hope the evaluation is fair and accurate.

	PERSONA NAME Student (User)	
DOES - Explains concepts in their own words. - Reviews AI-generated feedback. - Tracks progress using previous evaluation history.		FEELS - Nervous before oral assessments. - Motivated after receiving constructive feedback. - Confident when the similarity score improves.
